## OKLAHOMA STATE BUREAU OF INVESTIGATION

ROBERT J. HICKS  
*Director*

DEWADE LANGLEY  
*Deputy Director*

Dear Oklahomans:

I am pleased to report that Oklahoma experienced a decrease in the overall crime rate for the fourth consecutive year in 1990. This marks the longest span of declining crime rates since the collection of crime statistics began in this state in 1974.

While it is very encouraging to see a continued drop in our overall crime rate, I am alarmed to see the dramatic increase in violent crime for the third straight year. In particular, I am most disturbed to see rape increase 22.2 percent.

A great deal of work goes into collecting, verifying, collating, and distributing these statistics. The purpose of this work is to provide as accurate a picture as possible of Oklahoma's crime problem.

I encourage you to study these figures closely and to do what you can to help lower Oklahoma's crime rate. Whether you are a member of the criminal justice community, an elected official, or simply a concerned citizen, do whatever you can to make our state a better place in which to live.

Sincerely,

ROBERT J. HICKS  
Director

## Law Enforcement Code of Ethics

*As a Law Enforcement Officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

*I will keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

*I will never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

*I recognize the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

# INTRODUCTION

## BACKGROUND

The UCR Program was conceived, developed and implemented by law enforcement for the express purpose of serving law enforcement as a tool for operational and administrative purposes. Under the auspices of the International Association of Chiefs of Police (IACP), the UCR Program was developed in 1930. Prior to that date, no comprehensive system of crime information on a national scale existed. This was, primarily, due to the fact that the criminal statutes varied so greatly from state to state in their use of terminology to define criminal behavior. To overcome this problem, a set of definitions for specific criminal acts was devised. These definitions were developed following an in-depth research effort relative to each of the state criminal statutes extant. It was determined that law enforcement would tabulate the number of criminal acts as defined by the UCR Program as these acts were brought to the attention of law enforcement. Recognizing the problem of coping with mere volume, it was decided that only those criminal acts deemed serious would be counted. It was necessary to define "serious." In this regard, a criminal act is considered serious if it meets a set of criteria; namely, that the act would occur regardless of geographical location; that it would be an offense most likely to be reported to law enforcement; that it would affront the moral sensitivities of our society's rational being; and that it would occur with sufficient frequency so that counting it would be worthwhile statistically.

## STATE UCR PROGRAM

During that period of time when UCR was still a concept, it was recognized that the individual states would also need crime information of particular interest to the state but of no great importance to the national view of crime. It was not until the latter part of the 1960's that funds became available for states to consider the development of their own individual reporting systems.

The purpose for a state UCR Program is multifaceted. First, with personnel administering a state program, more direct and meaningful contact with individual contributors is realized. Second, the ability to expand contributorship exists due to state personnel readily available to lend assistance. Third, mandatory participation insures a law enforcement agency will either enhance an already existent records system or will implant one capable of producing the needed data. Fourth, with state personnel reviewing information emanating from law enforcement contributors and this information being checked at the national level, the validity as well as completeness of data is further insured. Fifth, individual state programs can address problems that are unique to the state.

The Oklahoma State Bureau of Investigation assumed the statewide administration of the UCR Program on September 1, 1973. This document is the seventeenth annual report, presenting statistical information collected and compiled through the year 1990 with a comparative analysis of the years 1989 and 1988.

PROGRAM**

## LEGISLATIVE MANDATE

The Annual Report "CRIME IN OKLAHOMA" presents criminal justice information in terms of offenses known to the police and criminal arrest activity in accordance with guides and regulations prescribed by law.

The Oklahoma Legislature, in establishing the Uniform Crime Reports (UCR) statute, mandated the responsibility and authority for UCR data collection and dissemination to the Oklahoma State Bureau of Investigation. The portion of this statute relating to Uniform Crime Reporting is shown below:

SECTION 1. A uniform crime reporting system shall be established under the direction, control and supervision of the Director of the Oklahoma State Bureau of Investigation. The Director shall have the power and duty, by such rules and regulation as he may deem necessary, to collect and gather such information from such state, county, city and town law enforcement agencies as may be and is hereinafter prescribed in this act.

SECTION 2. The Oklahoma State Bureau of Investigation is hereby designated as the agency which shall collect, gather, assemble and collate such information as is prescribed by this act.

SECTION 3. All state, county, city and town law enforcement agencies shall submit a monthly report to the Oklahoma State Bureau of Investigation on forms prescribed by the Bureau; which report shall contain the number and nature of offenses committed within their respective jurisdictions, the disposition of such matters and such other information as the Bureau may require, respecting information relating to the cause and prevention of crime, recidivism, the rehabilitation of criminals and the proper administration of criminal justice.

SECTION 4. Upon receipt of such information the Director shall have such data collated and formulated and shall compile such statistics as he may deem necessary in order to present a proper classification and analysis of the volume and nature of crime and the administration of the criminal justice with this state.

## OBJECTIVES

The fundamental objectives of the Oklahoma UCR Program are:

- (1) Inform the governor, legislature, other governmental officials and the public as to the nature of the crime problem in Oklahoma, its magnitude and its trends.
- (2) Provide law enforcement administrators with criminal statistics for administrative and operational use.
- (3) Determine who commits crimes by age, sex and race in order to find the proper focus for crime prevention and enforcement.
- (4) Provide base data and statistics to measure the workload and effectiveness of Oklahoma's criminal justice system.
- (5) Provide base data and statistics to measure the effects of prevention and deterrence programs.
- (6) Provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.
- (7) Provide data to assist in the assessment of societal and other causes of crime for the development of theories of criminal behavior.
- (8) Provide the FBI with complete UCR data to be included in the national crime reports.

## REPORTING AND COLLECTION PROCEDURES

Under the Oklahoma UCR Statute, all state, county, city and town law enforcement agencies are required to submit crime reports.

The Uniform Crime Reporting Division in an effort to maintain quality and uniformity in the data received furnishes field representatives who provide training in Uniform Crime Reporting procedures. Because a centralized records system is necessary to the sound operation of any law enforcement agency and is an essential basis for crime reporting by the agency, the Uniform Crime Reporting Division provides technical assistance to any law enforcement agency in the establishment or maintenance of a police records system.

On a monthly basis, law enforcement agencies report the number of offenses that become known to them during the month in the following crime categories: Murder, manslaughter, forcible rape, robbery, assault, burglary, larceny and motor vehicle theft. This count is taken from a record of all complaints of crime received by the law enforcement agencies during their own operation. Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from the actual count. The number of "actual offenses known" in these crime categories is reported without regard to (1) whether anyone is arrested for the crime; (2) the stolen property is recovered; (3) the local prosecutive policy; or (4) any other restrictive consideration. Law enforcement agencies report on a monthly basis the total number of these reported crimes which they clear either by arrest or exceptional means. A separate count of crimes cleared which involve only persons under the age of 18 is shown. To supplement the offense information such data as the value of property stolen and recovered, circumstances surrounding homicides, additional information concerning assaults on police officers and other pertinent information is collected.

In addition, monthly reports for all persons arrested on all criminal offenses are collected. These reports provided age, sex and race information on each person arrested with the adult and juvenile arrest separate.

Law enforcement employees data specifically encompasses the number of sworn and civilian personnel and collected annually.

## VERIFICATION

A primary consideration in the collection of criminal statistics in the State of Oklahoma is the uniformity and accuracy of the data. The Oklahoma UCR Guide Manual and personal instruction by the UCR field representatives do not necessarily guarantee the accuracy of the reports submitted by the contributors. Additional verification is necessary.

Each report received is recorded, examined and verified for mathematical accuracy, and more importantly, for reasonableness. Validity and the possibility of duplication is checked numerous times to avoid misinformation.

Minor errors are corrected by telephone between the field representatives and reporting agency while substantial variations are adjusted through personal visits with individual contributing agencies. The personal contacts are invaluable to the accuracy and quality of reporting. Field representatives are engaged in a constant educational effort, and as such, provide a vital link between the UCR Program and the contributor.

## USES OF CRIMINAL JUSTICE DATA

Throughout history crime has generally been perceived as a serious social problem. Criminal behavior is one of the major domestic concerns in our nation today, and our citizens have the right to be informed of the full nature, magnitude and trend of the crime problem. Moreover, without such a disclosure it is impossible to assess the real costs of crime in our society. For, in the final analysis, it is the public who pays the costs - psychic, physical and economic - of criminality. They are the group who have their behavior patterns altered by their fear of attack, suffer the consequences of physical assault and have their possessions stolen or damaged. They pay higher insurance rates because of offenses against their property, as well as a higher price for goods and services due to business losses from organized and unorganized crime. The public has a right to know the complete extent of all these costs. Through their taxes they support the institutions of our criminal justice system and, as citizens in a democracy, they have the right and the obligation to appraise the allocation and effectiveness of limited governmental financial resources. Finally, both cooperation as individuals and group action by our citizens are required for crime reduction and the improvement of our criminal justice system. But cooperation and action will not be forthcoming unless and until they receive a more complete disclosure of the true nature of crime and criminal justice.

Effective solutions to the crime problem will depend on increased research to determine and assess the cause of crime and to develop and test theories of criminal behavior. All of these efforts require comprehensive and valid criminal statistics. Social scientists and professional criminologists require quantified data that will indicate who commits what types of crimes in order to establish typical "profiles" of criminals. Such profiles can help determine the proper focus and direction of crime prevention programs. However, studies of only limited applicability have been conducted to date, due to the lack of available quantified information.

Administrators at every level of the criminal justice process require information with which to measure their workloads, identify and solve operational problems and evaluate effectiveness. The lack of valid and complete statistics is critical when the needs of these managers are considered. Data is required for program planning, development, budgeting and evaluation, for estimating resource requirements and for allocating manpower and equipment. Information is also required to develop comparative norms of performance, for cost effectiveness studies and for establishing data bases with which to analyze the criminal justice system at the local level.

The usefulness of Uniform Crime Reports is extensive for law enforcement agencies. Information provided by the report can be applied to areas of statistics and hard data, as well as to aspects of planning and research.

**INDEX CRIME ANALYSIS**

# INDEX CRIME OFFENSES

The following three graphs illustrate the variations of the 1988, 1989, and 1990 total number of offenses by month. This information is based on the Oklahoma Crime Index.

The first graph represents the total number of index crime offenses occurring each month, and the following two graphs take the analysis further with breakdowns of violent crimes and nonviolent crimes by month.

August of 1990 reflected the highest number of index crimes reported, 16,075, and the month showing the lowest reported offenses in 1990 was February with 13,492 index crimes.

A further breakdown of the 1990 index crime offenses shows that July had the greatest number of violent crimes with 1,744 offenses reported, and the lowest number of violent crimes occurred in February with 1,177 offenses reported. A monthly analysis of the nonviolent crimes indicates that August and February showed the highest and lowest number of offenses with monthly totals of 14,370 and 12,315 respectively.

# MURDER

**MURDER** - the unlawful killing of a human being in which the element of malice aforethought was present.

Any death due to a fight, argument, quarrel, assault or commission of a crime is included. This index offense, as in all other crime index offenses, is scored by law enforcement officials on the basis of their investigation and does not include the findings of a court or the decision of a prosecutor. Manslaughters, suicides, accidental deaths and justifiable homicides are excluded in this category. Attempts to kill and assaults to kill are scored as assaults and not as murder.

## 1990 SUMMARY ANALYSIS

A total 253 murders were reported by law enforcement agencies in the State of Oklahoma for the year 1990.

Murders accounted for approximately 1.5% of all violent crimes and approximately .1% of all index offenses reported.

A total of 227 murders were cleared by arrest or exceptionally cleared, representing an 89.7% clearance rate statewide.

The age group accounting for the highest percentage of persons arrested for murder, approximately 18.9% occurred in the 25-29 age category. Of all persons arrested for murder, 55.3% were White, 37.5% were Black, 6.8% were Indian and .3% were Asian.

Firearms were employed in 57.7% of all reported murders. The use of a knife or other cutting device was involved in 18.6% of the murders.

The murder of one family member by another accounted for 53 offenses or 20.9% of all murders. Of the 253 murders, 10.7% resulted from one spouse killing the other.

Of the 253 reported murders, 66.8% of the victims were acquainted with the offender.

The value of property stolen in actual offenses of murder totaled \$49,064 for 1990.

## MURDER BY MONTH

## MURDER BY DAY OF THE WEEK

As illustrated in the following table, the victims of murder during 1990 were male in approximately three out of five instances. Approximately 61 out of 100 murder victims were White, 32 were Black, and 5 were Indian. The largest number of murders occurring in any ten-year age bracket was 20 to 29 age group.

# RAPE

**RAPE - the carnal knowledge of a female forcibly and against her will.**

Forcible rape differs from other violent crimes in that the victim, in many cases, is hesitant in reporting the offense to police. The rigors of court procedure and the embarrassment caused by the stigma placed on the crime has a deterrent effect on the victim's willingness to make the crime known to police.

For the purposes of Uniform Crime Reporting, rape is divided into two categories: (1) rape by force and (2) attempts to rape. Assaults to commit forcible rape are included in the index offense category of rape; statutory rape is not reported in this category.

## 1990 SUMMARY ANALYSIS

A total of 1,478 forcible and attempted rapes were reported by law enforcement agencies in the State of Oklahoma for the year 1990.

Forcible rapes accounted for approximately 8.6% of all violent crimes and approximately .8% of all index offenses.

A total of 867 rapes were cleared by arrest or exceptionally cleared, showing a 58.7% clearance rate statewide.

Of all persons arrested for rape, 49.5% were under the age of 25. Of those arrested, 57.8% were White, 35.9% were Black, 5.8% were Indian and .3% were Asian.

The value of property stolen in the actual offenses of rape totaled \$12,909 for 1990.

**OKLAHOMA**

**ARREST DATA**

The Oklahoma Uniform Crime Reporting Program requests the monthly submission of data concerning persons arrested in Oklahoma. A record of total arrest activity for criminal acts in both Part I and Part II classifications is collected and analyzed according to age, sex and race. With the exception of arrests for driving under the influence, and transporting an open container, traffic arrests are not reported.

A total of 153,879 arrests were reported in 1990, and of that total 26,195 were juvenile offenders. Arrests increased 6.5% or 9,404 arrests from the 1989 figure of 144,475.

A person is counted on the monthly arrest report each time he is arrested. A person may be arrested several times during the month such as in the crimes of public drunkenness, disorderly conduct and similar violations. It should also be noted that if a person is arrested for several different crimes at the same time, the arrest is shown only for the highest offense the person committed at that time.

Analysis of reported arrests for 1990 shows that 19.0% of all arrests occurred in the index offenses. The highest clearance rate of a particular index offense occurred in the murder category with 89.7% of all murders being cleared by arrests or exceptional means.

Alcohol-related arrests (driving under the influence, liquor laws and drunkenness) constituted 43.3% of the total arrests reported in 1990. This percentage represents the arrest of 63,971 adults and 2,608 juveniles. The highest percentage of all arrests occurred in the category of drunkenness. This category represented 23.4% of all arrests made in 1990.

## CLEARANCE RATES

For crime reporting purposes, a crime index offense is cleared when: (1) a law enforcement agency has identified the offender; (2) there is enough evidence to charge him and; (3) he is actually taken into custody. The arrest of one person may clear several crimes or the arrest of several persons may clear only one crime. The number of arrests and the number of clearances for any particular offense should not be compared as the numbers may not, and likely will not, be the same.

Clearances are also reported in exceptional circumstances when some element beyond law enforcement control precludes formal charges, i.e., handling of juveniles, a double murder, suicide of the offender and other exceptional circumstances.

## COLLECTION OF DISPOSITIONS

The Oklahoma Uniform Crime Reporting Program requires the collection of the police disposition of juveniles. The purpose for this is to collect data that will be meaningful in the disposition being made of juveniles who are taken into custody or arrested by police. When an adult is arrested he is usually held for prosecution for some charge or is released for future handling in court. This is not necessarily the case with juveniles. Depending on the seriousness of the offense and the juvenile's prior record many are warned by the police and released to parents, relatives, friends or guardians. In certain instances juveniles are referred to the probation department or some other branch of the juvenile court. In other instances, juveniles are referred to welfare agencies, to other police agencies, or in the case of serious offenders, to criminal or adult court by waiver of the juvenile court.

The word "arrest" as it applies to juveniles is intended to mean the police handling of all juveniles who have committed a crime and are taken into custody under such circumstances that were the juvenile an adult, an arrest would have been made. Police "contacts" with juveniles where no offense has been committed are not counted as arrests. Instances wherein a juvenile is taken into custody for his own protection, such as in neglect cases, and where no crime is committed are not listed as arrests.

Domestic abuse includes such offenses as murder, sex crimes, assault and assault/battery. Family or household members means spouses, former spouses, parents, children, persons otherwise related by blood or marriage, or living in the same household or who formerly lived in the same household. This includes the elderly and handicapped.

## 1990 SUMMARY ANALYSIS

**CRIME INDEX OFFENSES**

**BY CONTRIBUTOR**

The following section sets forth a specific breakdown of Crime Index Offenses by each contributing law enforcement agency for the years 1988, 1989, and 1990.

It must be remembered that the total offenses reported are shown here, and the statistics are included for each month an agency reported before the final cutoff date of January 31, 1991. If the data reported appears insufficient, it is important to note that not all agencies submitted reports for the full year in 1988, 1989, and 1990. For an accurate representation of reporting, refer to Section IX, Contributor Participation.

As is apparent, the delinquency of reports greatly hampers the Oklahoma Uniform Crime Reporting Program. In some states, crime trend data is only computed from those agencies that had a complete reporting record for that year or years. The Oklahoma Uniform Crime Reporting Program, however, in its continuing endeavor to provide complete criminal statistics for the State of Oklahoma, employs the total number of offenses reported in its criminal statistical analysis.

**OKLAHOMA  
CONTRIBUTOR  
PARTICIPATION**

## HISTORY OF PROGRAM PARTICIPATION

Oklahoma has approximately three hundred (300) sheriffs offices and police departments. During 1973 an average of sixty-five (65) law enforcement agencies contributed monthly UCR returns directly to the Federal Bureau of Investigation's Uniform Crime Reporting Section in Washington, D.C.

The Oklahoma State Bureau of Investigation assumed the statewide administration of the UCR Program on September 1, 1973. Since that time, an astounding increase in the number of agencies who report directly to the Oklahoma State Bureau of Investigation has been realized.

The table below sets forth the number of law enforcement agencies by type that have participated in the Oklahoma Uniform Crime Reporting Program for the years 1990, 1989, and 1988.

## **APPENDIX**

It was apparent at the initiation of the UCR Program that the quality of the program was somewhat limited, because obviously not every crime can be accounted for. When analyzing UCR data it must be remembered that these statistics are based upon offenses reported or known to the police.

In many instances and for varying reasons citizens do not report crimes. Victims may consider the offenses to be of little consequence; they believe there is nothing the police can do about them; or they fear retaliation from offenders because they have shared willingly in such offenses as illegal sex acts, gambling or drug use. Consequently, information concerning some offenses is never entered in the present statistical reporting system. A national survey conducted for the President's Commission on Law Enforcement and Administration of Justice indicates that half the victimizations are not reported to law enforcement authorities.

Oftentimes law enforcement agencies themselves question the merit of the UCR Program. A common complaint concerns jurisdiction when a sheriff's department is called upon to investigate a crime within city limits and makes an arrest in connection with the offense. The sheriff's department feels it is necessary to score the offense, but under UCR guidelines the city must report the offense, the clearance and the arrest. It must be remembered that Uniform Crime Reports are not activity reports, but are for the purpose of measuring the extent and type of crime by geographic location.

The information gathered and disseminated by this report is the most accurate crime information currently available in Oklahoma. Caution has been exercised in the past and will continue to be practiced when the subject of direct comparisons are suggested. The primary reason for this caution is caused by a great number of socio-economic problems. Likewise, when comparing offenses and arrest data, it should be remembered that crimes relate to events, while arrests relate to persons. A single crime may involve several criminals, several offenders and several victims.

Set forth below are some additional conditions which will, by type and volume, affect the crime that occurs from place to place. These same conditions will also affect the amount of crime actually reported.

1. Density and size of the community population and the metropolitan area of which it is a part.
2. Composition of the population with reference particularly to age, sex and race.
3. Economic status and mores of the population.

4. Relative stability of population including commuters, seasonal and other transient types.
5. Climate, including seasonal weather conditions.
6. Educational, recreational and religious characteristics.
7. Effective strength of the police force.
8. Standards governing appointment to the police force.
9. Policies of the prosecuting officials and the courts.
10. Attitude of the public toward law and enforcement problems.
11. The administrative and investigative efficiency of the local law enforcement agency including the degree of adherence to crime.

Because they are influenced by many variables, current methods of gathering and reporting offenses and arrest data provide a less than complete picture of criminality in our society. However, despite these shortcomings, there is at present no other information system available that will more adequately perform this task.

## GLOSSARY OF TERMS

**ADULT** - For Oklahoma Uniform Crime Reporting purposes, a person 18 years of age or more.

**ARREST RATE** - The number of arrests reported for Part 1 and Part 11 offenses for each unit of population, generally per 100,000. Arrest rates are computed in the same manner as crime rates.

**CLEARANCE RATE** - The number of clearances reported for Part 1 Offenses. Divide number of clearances by number of offenses to determine clearance rate.

**CLEARED BY ARREST** - For UCR purposes, an offense is cleared by arrest or solved when at least one person is (1) arrested, (2) charged with the commission of an offense and (3) turned over for prosecution.

**CRIME FACTORS** - Conditions which affect the amount and type of crime that occurs in a geographical area.

**CRIME INDEX** - The sum total of seven major offenses used to measure the extent, fluctuation and distribution of crime in a given geographical area. Crime classifications used in the index are: (1) murder, (2) forcible rape, (3) robbery, (4) felonious assault, (5) breaking and entering, (6) larceny-theft and (7) motor vehicle theft. Each of these offenses is referred to as an "Index Offense."

**CRIME RATE** - The number of Index Offenses reported for each unit of population, generally per 100,000. Crime rates are computed for communities with varying populations by dividing the number of Index Crimes by the population and multiplying the answer by 100,000.

**EXCEPTIONAL CLEARANCE** - A crime solution or clearance recorded when some element beyond law enforcement control precludes the placing of formal charges against an offender.

**JUVENILE** - For Oklahoma Uniform Crime Reporting purposes, a person under the age of 18.

**NONVIOLENT CRIME** - Consists of the Index Offenses of Breaking and Entering, Larceny-Theft and Motor Vehicle Theft.

**PART 1 OFFENSES** - The first of two main categories of crime classes composing a universal crime classification system established for crime reporting purposes. Part 1 Offenses are by their nature more serious and/or occur most frequently. The monthly tabulation of Part 1 Offenses provides a count of "offenses known."

**PART II OFFENSES** - The second of two main categories of crime classes composing a universal crime classification system established for crime reporting purposes. Part II Offenses are generally less serious in nature and/or occur less frequently. Monthly tabulations of Part II Offenses are limited to arrest information only.

**VIOLENT CRIME** - Consists of the Index Offenses of murder, rape, robbery, and aggravated assault.
